

1. Proof Statement: -

I build practical AI applications that solve real-world problems by combining Machine Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Computer Vision, and modern AI engineering practices. My work focuses on developing reliable, scalable, and user-centered AI solutions while continuously learning emerging technologies.

One Person: -

An AI Recruiter or Hiring Manager looking for an AI Engineer or Generative AI Developer.

One Action: -

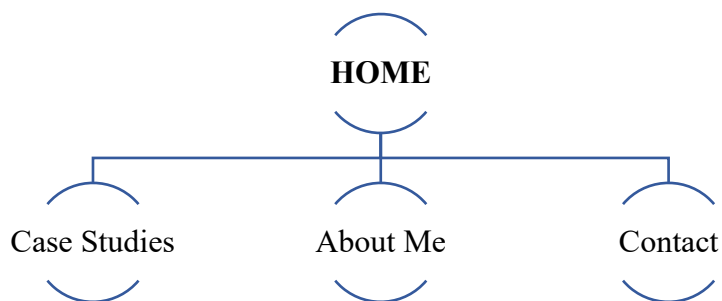

Contact me for an AI Internship or Entry-Level AI Engineer opportunity.

2. Portfolio Sitemap: -

Portfolio Goal

My portfolio is designed to guide an AI recruiter or hiring manager from understanding who I am, reviewing my work, building trust through real-world case studies, and finally contacting me for an AI Internship or Entry-Level AI Engineer opportunity.

Portfolio Sitemap Structure: -

Home

- Introduces who I am and what I build.
- Displays my proof statement.
- Highlights 2–3 featured AI case studies.
- Includes a clear call-to-action directing recruiters to explore my work or contact me.

Case Studies

- Showcases my best AI, Machine Learning, and Generative AI projects.
- Explains the problem, solution, technologies used, implementation process, and measurable outcomes.
- Demonstrates my technical skills and problem-solving approach.

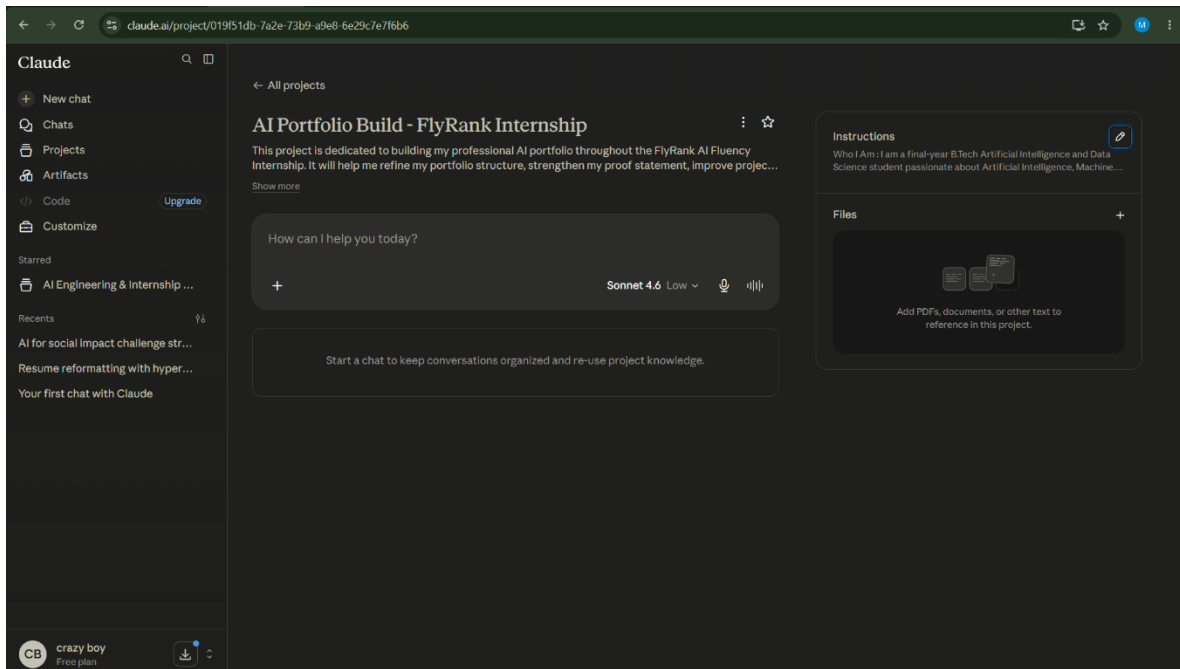

About Me

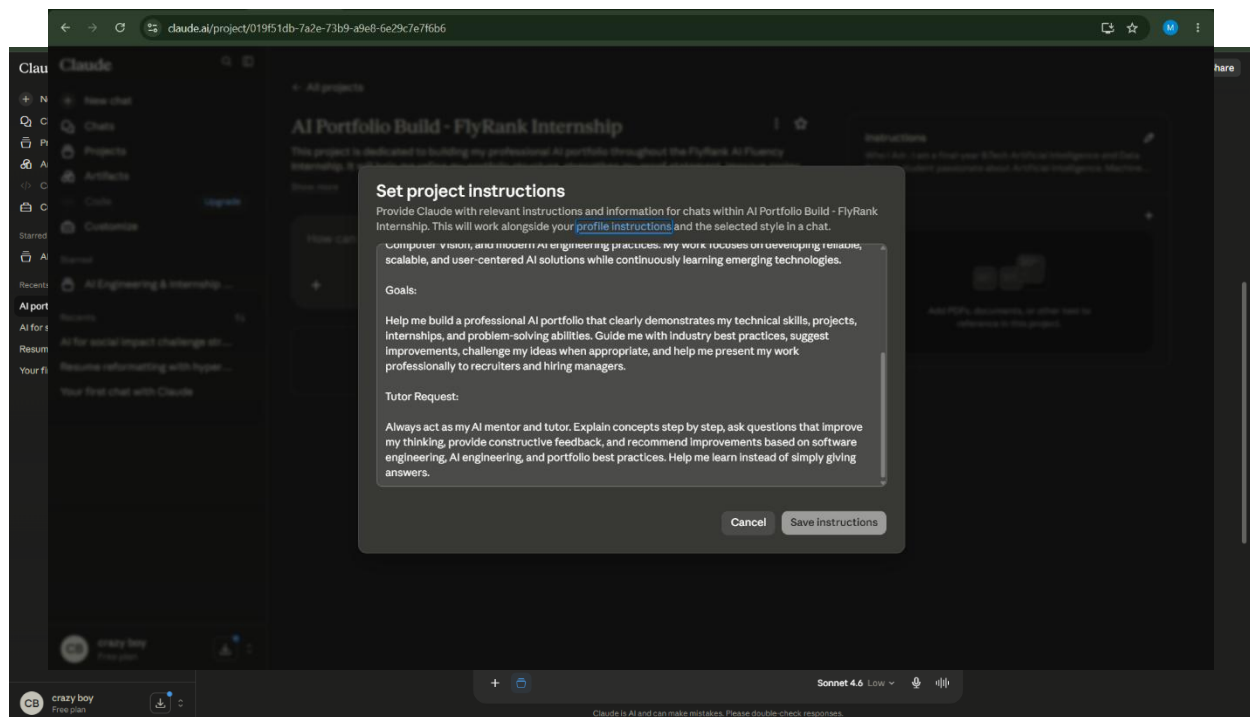

- Introduces my background, education, internships, technical skills, and career goals.
- Includes my resume download for recruiters.

Contact

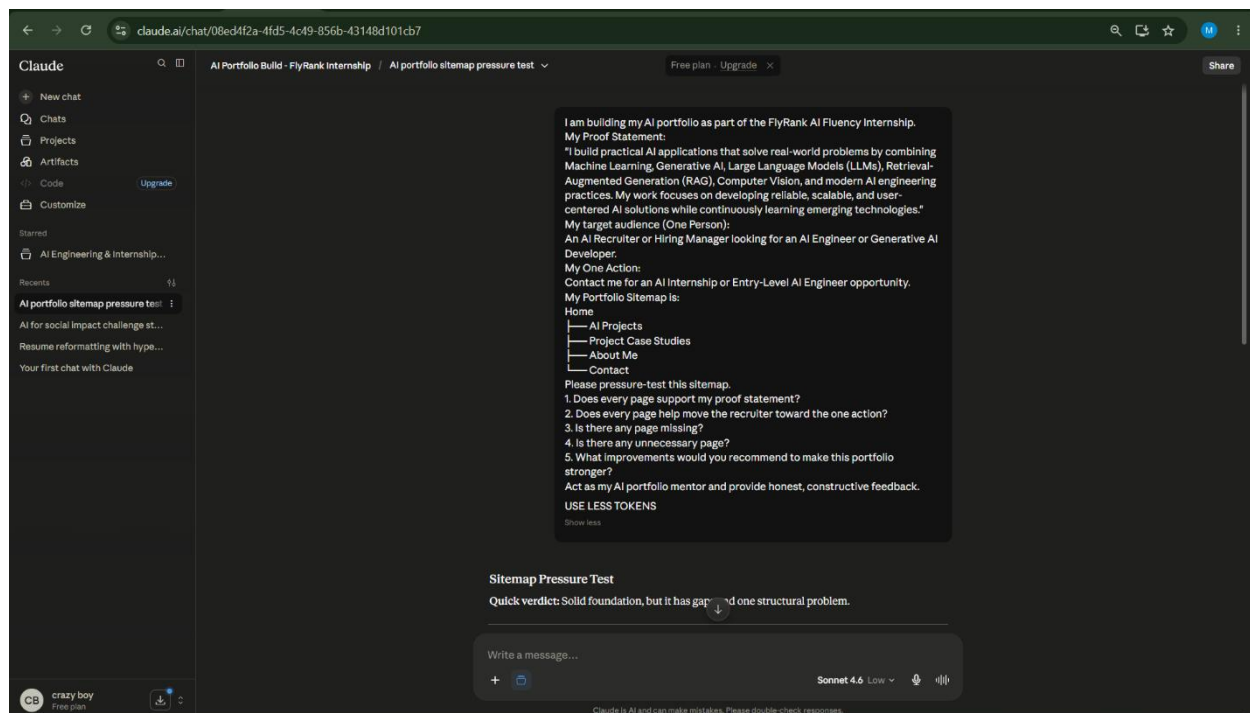

- Provides my email, LinkedIn, GitHub, and other professional contact details so recruiters can easily reach me.

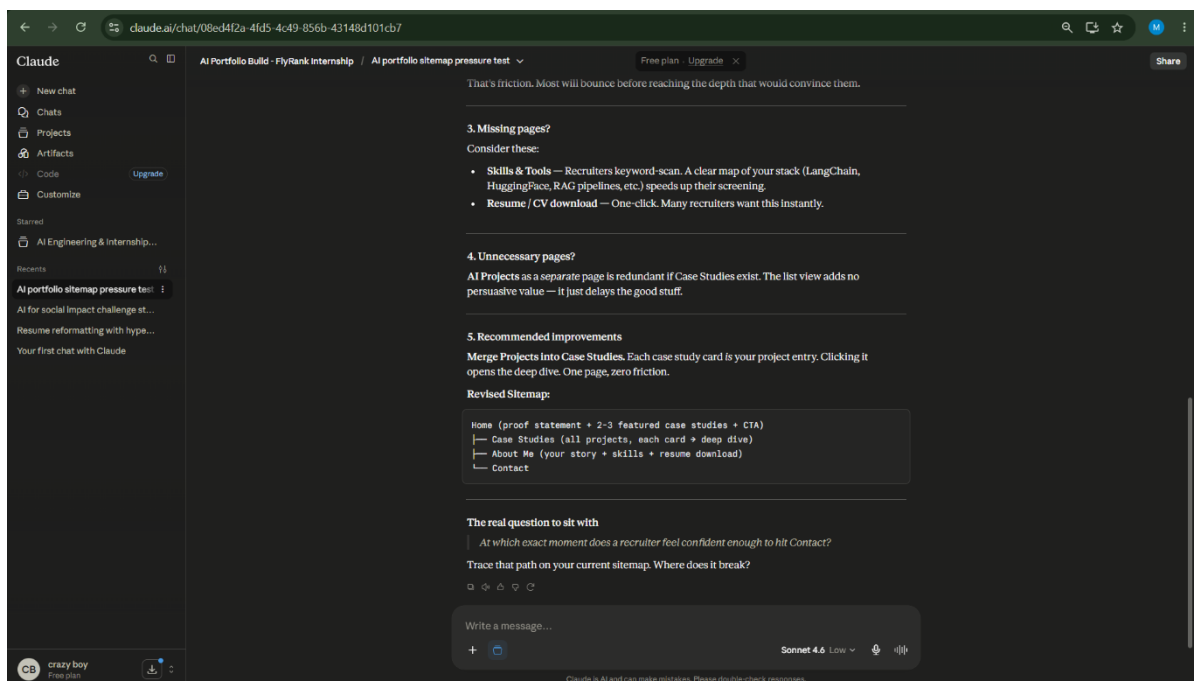

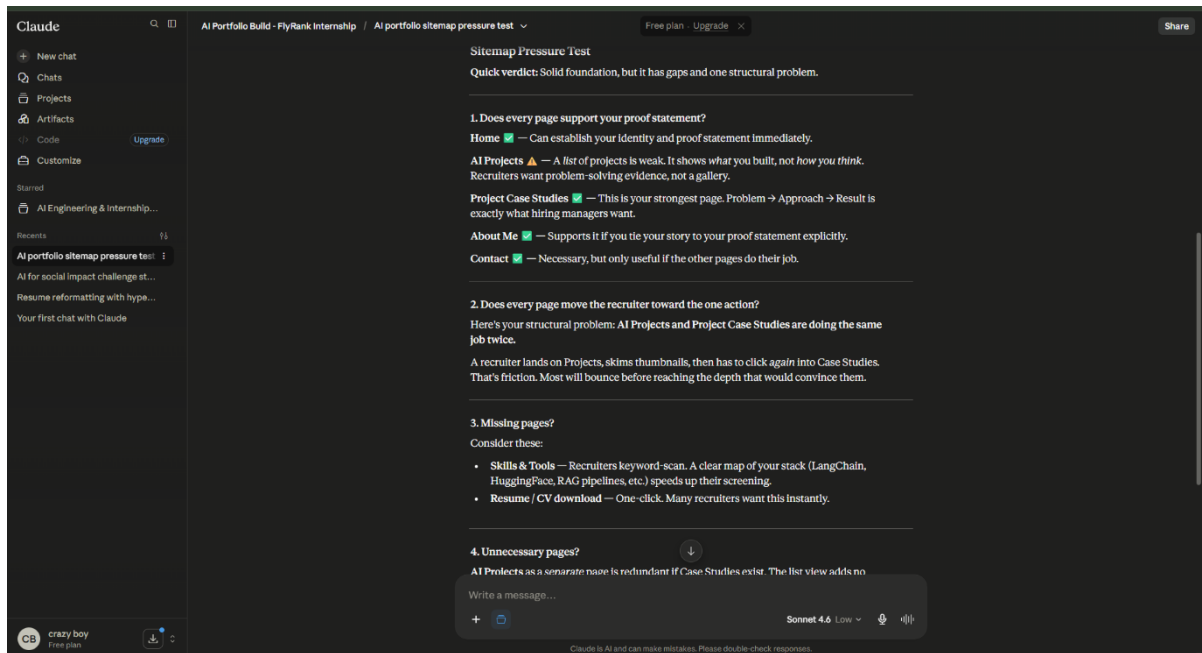

3. Create a New Claude Project

3. Run the Pressure-Test Prompt

4.Change Made Based on Claude's Feedback

After reviewing Claude's feedback, I simplified my portfolio sitemap by merging the separate AI Projects page into a single Case Studies page. This reduces unnecessary navigation and allows recruiters to see both the project overview and detailed implementation in one place. I also decided to include my technical skills and resume download within the About Me page to make important information easier to access.
